

Improvements in batching and mixing systems for GRC

Ian G White

Power-Sprays Ltd, Bristol, United Kingdom.

Summary

The paper will review recent developments in systems to batch and mix GRC, in particular the new Chopped Fibre Dispenser and the new range of dual purpose mixers for manufacturing sprayed and premix types of GRC. The paper will discuss the background to these recent developments including the technical problems encountered and how these have been resolved. Examples of installations where the new technologies are being used will be presented.

Keywords: mixers chopped fibres, batching, dispenser.
